*The Maddox-Muse Center & the Bass Performance Hall are non-smoking facilities.*
Maddox-Muse Center

Maddox-Muse Center was originally built as the Fort Worth Medical College. The Fort Worth Medical College was established as the medical department of Fort Worth University in 1894 by a group of prominent area physicians. Among those in its small charter class was Francis Daisy Emery, the first woman medical school graduate in Texas. The college moved to its location in 1905, and in 1911 became affiliated with Texas Christian University. In 1918, the medical college relocated to Dallas to become associated with Baylor University's medical school. During its 24 years in Fort Worth, the Medical College graduated approximately 400 students.

The building was renovated in 1998 by Performing Arts of Fort Worth, to be used as administrative offices. In 2000, David Schwartz designed the two recital halls (The Van Cliburn Recital Hall and the McDavid Studio) that were added on to the original building. These halls were built in mind for the resident companies to utilize for practice and for commercial use for private and public events.
Location & Contacts

McDavid Studio Address
301 E. 5th Street

*Bass Performance Hall lighting inventory can be used in McDavid Studio—subject to availability---Please see Bass Performance Hall Technical Specifications.

**Cable**

5’, 10’, 25’, 50’, 100’ lengths of cable are available. Twofers are available. A detailed cable inventory is available upon request.

**Audio System**

**Control Equipment**

- All signal routing and speaker processing is done with BSS London Soundweb processor
- All amplifiers are by Crest Audio.

**Main Speakers – McDavid Studio**

- 2-EAW JF200 (per side) [4 Total]
- 1-EAW JF60 (center fill)
- 1-EAWSB250P (per side) [2 Total]
Signal Mixing and Processing Gear

House Console Midas Venice 320
- 24 input channels plus 4 stereo channels, each with insert points (TRS) and direct outputs (TRS phone)
- 4 assignable groups with inserts (TRS)
- 6 auxiliary sends (2 pre fade/2 post fade/2 selectable)
- "Masters B" outputs (balanced XLR/pre or post fader selectable)
- 4 Band EQ with sweep able midrange
- High pass filter on each input channel, fixed at 80 Hz

Signal Processing and Equalization
- 2 – T.C. Electronics M-1 stereo multi-effects unit
- 1 – Yamaha YDP 2006 parametric equalizer
- 1 – Klark Teknik DN 504 quad compressor/limiter (4 channels total)
- 1 – Klark Teknik DN 514 quad noise gate (4 channels total)
- 2 – BSS 960 graphic equalizers (4 channels; left, right, 2 monitor mixes)

Permanent multi-pair cables terminated in mass connectors have been installed in channels under the floor between mix position and stage area, eliminating the need to run cables exposed along the floor.

Prerecorded program playback is available in standard compact disc, computer, and other mobile formats.

Microphones, additional speakers, supplemental support gear and backline resources are shared with the Bass Performance Hall and are subject to availability. Please contact the Production Department for a complete list or visit: [http://www.basshall.com/about/bass-performance-hall/technical-specifications/](http://www.basshall.com/about/bass-performance-hall/technical-specifications/)

Assisted Listening System
Williams Sound PPA-T45 transmitter (wireless, operating at 72.1 75.9 MHz) and suitable compliment of PPA-R38 receivers with Shure SE425 earphone for Assisted Listening sound reinforcement.
